# SharePoint 2013 Database Overview (SharePoint 2013 Solution Series Book 16)

Synopsis

SharePoint 2013 may be installed and configured using either SQL Server 2008 R2 or SQL Server 2012. Many times SharePoint Ad-ministrators and SharePoint Developers overlook SQL Server in a SharePoint environment. It is there, it functions, and itâ ™s a black-box to many. SQL Server is essential to a productive SharePoint farm as thatâ ™s where 90% of the content, configurations, settings, etc. are stored. Without SQL Server, there is no SharePoint. This guide explores the various databases that are created (or may be created) within a SharePoint 2013 farm. You may find other SharePoint database guides in Steveâ ™s SharePoint 2013 Solution Series or get them all together in The DBAâ ™s Guide to Share-Point 2013.
